Open financial data
• Equity prices
• Macro-financial indicators
• Firm metadata
Risk-monitoring substrate
• Rule-based monitoring score
• Macro-financial model score
• Combined monitoring score
Reliability and calibration layer
• Rule/model disagreement
• Historical reliability
• Reliability-adjusted confidence
• Abstention flag
Relational evidence layer
• Raw correlation networks
• Residual co-movement networks
• Downside tail networks
• Firm and sector attribution
Provenance evidence layer
• Evidence identifiers
• Source types
• Evidence roles
• Value snippets
• Entity-level records
Evidence-grounded LLM explanation
• Cited risk explanation
• Uncertainty-aware summary
• Relational attribution
• No unsupported causal or investment claims
Audit and evaluation
• Span-aware output parsing
• Citation correctness
• Invented evidence identifiers
• Uncertainty against the decision record
• Role statement, human-coded
